

PALLET RACKING SPLICE KIT ASSEMBLY INSTRUCTIONS

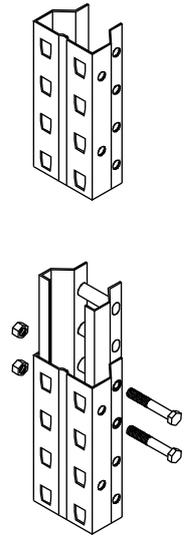

Important: Please follow instructions carefully when assembling this product

Splicers enable you to increase the height of your pallet racking by joining 2 frame sections together.

The splice kits come complete with Bolts and 1 kit is required for each leg (2 per frame)

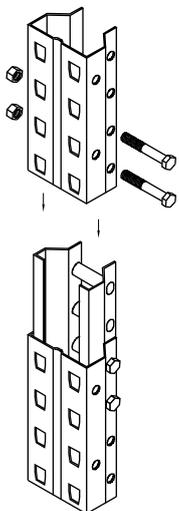

STEP 1

Slide the Splice Kit inside the lower frame so the top two holes of the frame line up with the lower two holes of the kit plate.

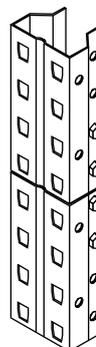

Then, insert the frame spacer and bolts.

STEP 2

Slide the upper frame over the exposed kit and repeat Step One by inserting the frame spacer and bolts.

STEP 3

Tighten all the bolts together.
